I WORK EXPERIENCES

SYSTEM ADMINISTRATOR

A7 STUDIO / KYIV

As a system administrator, I assembled system units, selected PC components, configured the environment and network for the functioning and interaction between the computers of production workers

2D ARTIST

COFFEEPOST / KYIV

While working as a system administrator, had the opportunity and desire to learn the skills of a vfx composer from my colleagues. I worked in the office as a composer for 2 years. Among my responsibilities: rotoscoping, clean up, keying, color correction, compositing shots

FREELANCE

NFT PROJECTS / KYIV

When the nft era came, I set up a kind of automation for creating collections in photoshop and did a lot of technical work with color variations for these collections.

I MY EDUCATION

QA LIGHT COURSES

QA testing course provided me with a comprehensive understanding of software testing concepts, principles, and techniques, and helped to develop the skills necessary to perform testing activities effectively and efficiently.

Completed coursework in software testing methodologies, test plan/test cases/checklists creation, requirements analysis and defect management. You can review my practice on GitHub using the QR code
